

Vulnerability Research Labs

Web / Full Stack Developer - Columbia, MD

Vulnerability Research Labs has spent more than a decade becoming the most respected source on cyber threat intelligence while maintaining the culture and feel of a start-up. We are the best in the field because we believe in our mission – to deliver unparalleled capabilities that alleviate the risk posed by today's cyber threats. We offer the opportunity to work on diverse technologies with the best developers in an exciting company with a flat organizational structure. Helping us address the newest cyber threats is where you come in!

We're currently seeking a Web Developer with experience in software packaging and build servers to join our team. As part of our software engineering group, you will join top-notch developers who design, engineer, and deliver software products to our end customers.

We are looking for:

An experienced full stack web developer who can

- Complete software packaging for web-based software
- Develop and maintain build servers for web-based software
- Collaborate on user interface design with VRL engineering teams and customers
- Develop new user interfaces and prototype future web front-ends
- Use Jenkins for continuous integration activities

Our day-to-day at Vulnerability Research Labs:

- Developers spend most of their time doing what they love, solving problems with code
- Writing cool NEW code on everything from currently operational systems to brand new research capabilities
- Working with other senior engineers to architect, design, and build new interfaces for a wide variety of tools
- Testing out ideas and automating code using a virtual lab.

Skills you will need and we will enhance:

- 5+ years experience with the following:
 - HTML/Javascript
 - Building and deploying a webserver based product
 - Python for web and database development
- 3+ years experience with the following:
 - Javascript frameworks such as Angular or Backbone
 - deb and rpm based packaging
- Experience with Jenkins and git for continuous integration
- Experience with Linux and bash
- Passion for web based front-end work

- Ability to perform well in a small team or independently
- Ability to articulate complex problems and solutions to the customer and senior staff in a clear and concise manner
- Preferred Skills:
 - Django
 - Git
 - Various web frameworks
 - Database optimization
- B.S. or M.S. degree in a technical discipline preferred
- U.S. citizenship

Things we like best about VRL:

- Minimal time in meetings
- The ability to go to conferences like Infiltrate, Blackhat, HiTB, and Shmoocon
- Real offices with doors and desks
- Good fresh brewed coffee and our own espresso machine
- A well-stocked pantry with food and beverages
- Loads of research and development tools at your disposal
- Most of all: interesting and challenging work and a great team to work with!

VRL is proud to be an Equal Employment Opportunity employer and does not discriminate on the basis of race, religion, gender, national origin, color, age, military service eligibility or veteran status, disability, sexual orientation, marital status or any other protected class. We encourage and support workplace diversity.

Qualified candidates should send their resumes to: info@vrlsec.com.

We are unable to hire non-US citizens. Please, no third party firms.
